Eagle  
Loc  
900

JM Eagle™ is changing the face of joint restraints with its new internal system, Eagle Loc 900™. Featuring BullDog™ technology, Eagle Loc 900™ installs with a single snap and keeps components away from corrosive elements, making it the cost-effective long-term solution to infrastructure challenges.

#### Eagle Loc 900™ Benefits:

- Simplifies installation
- Reduces labor costs
- Installs just like regular [C900](#)
- Eliminates exposure to corrosion

### FORD SIMTAP

Simtap is lightweight, powerful, and easy to use. The Ford Simtap is an excellent option for the contractor or utility wanting the flexibility to make a fast and easy tap without pulling out the big machines. The Simtap drilling machine assembles in seconds and works with most corporation stops. Simtap is powered by a 1/2" pneumatic drill, operating at low rpms, which virtually eliminates the risk of melting PVC and resists overheating during multiple taps.

**Click on the Ford Simtap photograph above to watch an educational video**

## WHEELER REX ValveMaster

ValveMaster™ is a portable valve exerciser that delivers 0--600 ft. lbs. of torque with finger tip control. All torque absorbed by frame to protect the operator. Powered by 13 hp. B and S Vanguard engine (Honda Optional). Standard features include digital counter, 2 inch ball hitch coupling, 4.80 x 12 inch wheels and auxiliary connections for use as hydraulic power source for other tools.

## SUCCESSFUL PARTNERSHIP

Genesee County Agri Business Park Project, Batavia, NY

**Sergi Construction** of East Aurora installed a pair of 10" HDPE IPS DR11 force sewer main pipes produced by [Charter Plastics](#) in 100' of 36" steel casing pipe with stainless steel casing spacers manufactured by [Pipeline Seal & Insulators](#). [Blair Supply](#) furnished the contractor with the 15,000' of HDPE Pipe, fittings, valves and appurtenances as well as fusion equipment to complete the project.

This difficult project was done using an open trench method and ran underneath the CSX railroad tracks. Due to the length and depth of the project it had to be installed in two 50' sections. The HDPE pipe was joined together in the ditch using electro-fusion couplings. The casing was then slid together for the final weld. **Jim Lewis** was the on-site rep for Blair Supply. A big thank you to **Frank Sergi** for allowing us to be a part of this project!
